

AUTOMATION AND EFFICIENCY

FOR TODAY'S CIP ADMINISTRATION

VUE Wrap-Up is an advanced, Web-based solution for streamlining and automating the management of Owner Controlled Insurance Programs (OCIP) and Contractor Controlled Insurance Programs (CCIP).

Total Automation

Automated checks, triggers, and actions reduce manual involvement.

360° Reporting

Auto and ad-hoc reports and graphs illustrate all aspects of program.

Reduced Paperwork

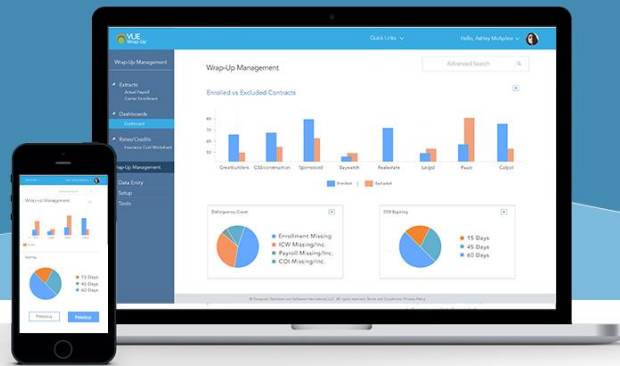

Online contractor portal drastically reduces paper forms.

Streamline Communication

Contractor Compliance Total Automation 360° Reporting Reduced Paperwork Online Accessibility The online contractor portal organizes subcontractor communications, eliminates paperwork and reduces the need for manual rekeying of data. The system facilitates communication on program status, with capabilities to send real-time reports to project stakeholders. Even carrier enrollment requests can be automated, further reducing manual effort around communications.

Manage Contractor Compliance

VUE Wrap-Up makes it easy to supervise accountability with comprehensive reporting on contractors' status. The system manages offsite coverage, evaluating contractors' policy details against compliance checklists and actively monitoring and sending reminders for expired policies. Monthly payroll is tracked for every subcontractor on a project, with automatic notices sent to anyone who's missing. The system helps administrators ensure every participant is compliant, which minimizes risk.

Online Accessibility

VUE Wrap-Up offers easy, browser-based access across various locations and user groups. There is no software to install, and data is backed up regularly and stored within a secure, SAS 70-compliant infrastructure. The mobile-ready and browser independent contractor portal allows large groups of contractor users convenient access to a user-friendly portal that becomes their home base for their participation in the program.

Total Control of Program Compliance

VUE Wrap-Up allows administrators to capture all subcontractor details, including experience modifiers, multiple contacts, offsite coverage, and payroll reports. Automated checkpoints within the system flag delinquencies and send automated communications, to ensure total compliance and maintain accurate contractor records.

Features

Reporting

- SmartVUE technology for advanced searching and manipulating real-time data
- Export data to Excel and import outside reports
- Dashboards and graphs
- Ad-hoc reporting and filters

Contractor Management

- Build master contractor profiles
- Track sub-contractor relationships in a hierarchy
- Record estimated and actual payroll
- Track contract enrolment status

Workflow

- Create and assign workload tasks
- Measure task completion with comprehensive tracking and auditing

Security

- Create user groups with permissions by role
- Restrict user access to necessary components
- Tracks and archive field level changes and deletions

Document Management

- Create, store and send letters and certificates
- Send documents via email or fax
- Track and archive correspondence

Product/Carrier Management

- Manage multiple carriers
- Adhere to carrier/policy-specific business rules
- Define coverage limits for each project or contract
- Bulk-upload and assign worker's comp Sub-policies

Contractor Portal

- Mobile-ready web-based portal
- Manage contractor communications
- Customize design to incorporate your branding
- Allow contractors to enrol, report payroll, and more, online

Claims Tracking

- Upload claims for every contract
- Calculate loss ratio by project

TECHNOLOGY

VUE Wrap-Up utilizes Microsoft platform technologies as the foundation for all system development providing a standard architecture to facilitate system upgrades and interfaces with other systems. Uses Microsoft ASP.Net MVC framework for optimal web browser support and excellent user experience.

VUE Software is an active member in Microsoft's Insurance Value Chain (IVC) program and works closely with Microsoft to ensure leading system integration, scalability, reliability and security.

ABOUT VUE Wrap-Up™

VUE Wrap-Up™ is an advanced, web-based solution for streamlining and automating the management of Owner Controlled Insurance Programs (OCIP) and Contractor Controlled Insurance Programs (CCIP). VUE Wrap-Up™ allows CIP administrators to leverage automation, reliability, and mobility without the overhead of maintaining an in-house system or the cost of outsourced services. Founded by Computer Solutions & Software International (CSSI) in 2006, VUE Wrap-Up is recognized today as the new standard in wrap-up technology. CSSI is also responsible for the creation of VUE Software, a single scalable platform built from the ground up for Insurers, MGAs, FMOs, IMOs, and Insurance Distributors who have outgrown their current tools and require greater automation for producer administration and sales processes.
